Phone: 9384708001

PROFESSIONAL SUMMARY

Computer Science and Engineering (Applied AI) student with hands-on experience building software projects using **Python, JavaScript, React, Vite, Tailwind CSS, HTML, and CSS**. Interested in **Artificial Intelligence, software development, frontend engineering, and practical problem solving**. Experienced in developing personal projects, maintaining GitHub repositories, working with Git branching workflows, and building responsive web applications. Currently focused on strengthening programming fundamentals, software development skills, and applied AI knowledge.

EDUCATION

B.Tech — Computer Science & Engineering (Applied AI)

Kalvium × St. Joseph University

[2nd year] – Present | India

Relevant Areas:

- Programming Fundamentals
 - Python Development
 - JavaScript
 - Web Development
 - Artificial Intelligence
 - Data Handling
 - Problem Solving
 - Software Development
-

TECHNICAL SKILLS

Programming Languages:

Python, JavaScript

Frontend Development:

React, Vite, Tailwind CSS, HTML5, CSS3

Development Tools:

Git, GitHub, VS Code, npm

Core Concepts:

Object-Oriented Programming, Data Structures & Algorithms Fundamentals, Problem Solving, Version Control

Currently Exploring:

Artificial Intelligence, AI Development, Data Processing, Advanced Python

PROJECTS

Personal Portfolio Website

React | Vite | Tailwind CSS | JavaScript

Advanced Calculator

Python | Math Module

To-Do List CLI

Python

GITHUB & VERSION CONTROL

- Experience using Git for source-code management and project development.
- Created and managed GitHub repositories for personal projects.
- Worked with branches, commits, remote repositories, pull requests, and upstream tracking.
- Experience managing multiple GitHub identities using SSH configuration.
- Followed branch-based development workflows for project changes.

GitHub: github.com/jeevanandjaisankar-JD

AREAS OF INTEREST

- Artificial Intelligence
 - Applied AI
 - Software Development
 - Frontend Development
 - Python Development
 - Web Technologies
 - Automation
 - Problem Solving
 - Open Source & GitHub
-

LEARNING & DEVELOPMENT

- Actively developing programming and problem-solving skills through hands-on projects.
 - Building projects to strengthen Python and JavaScript fundamentals.
 - Exploring Artificial Intelligence and practical AI development.
 - Practicing structured Git and GitHub workflows.
 - Continuously expanding frontend development knowledge with React and modern web technologies.
-

STRENGTHS

- Practical project-based learning
- Problem solving
- Continuous learning
- Adaptability
- Technical curiosity
- Self-directed development
